

TARGET To solve problems using information presented in bar charts.

Example

This bar chart shows the lengths of the stories written by five children.

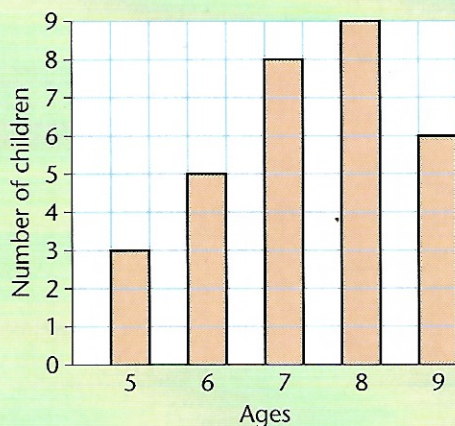

Look at the bar chart.

- 1 What is the value of one division (square)? 5 lines
- 2 How many lines did Amy write? 35 lines
- 3 Who wrote the least number of lines? Dee
- 4 Who wrote 40 lines? Ed
- 5 How many more lines were written by Beth than by Chris? 15 ($45 - 30$)

A

This bar chart shows the ages of children at a birthday party.

- 1 How old was the youngest person at the party?
- 2 How old was the oldest child?
- 3 How many of the children were 7?
- 4 What was the most common age?
- 5 How many more children were 8 than 9?
- 6 How many fewer children were 5 than 6?
- 7 How many more children were 7 than 9?
- 8 How many children were at the party altogether?
- 9 How many of the children were less than 7 years old?
- 10 How many children were older than 8?
